

# Connect on a Global Level with LINX & IX Reach

ixreach **LINX**  
an IIX company — Est. 1994 —

As a LINX Connexions Partner, IX Reach can connect their customers via their reseller port to the London Internet Exchange in London.

Benefit from international peering opportunities and everything the LINX membership has to offer and with ease!

## About LINX

The London Internet Exchange (LINX) is one of the global leaders of Internet Exchange Points (IXP).

With over 650 members connecting from over 65 different countries worldwide, LINX members have access to direct routes from a large number of diverse international peering partners.

Our company ethos and aspirations result in constant growth and improvement of our services. As a result, members have access to the most attractive peers, at the lowest cost.

As a not-for-profit organisation, we focus on investing our service and membership fees into strengthening LINX network services.

## Why Join LINX?

Becoming a member of LINX, either direct or via our Connexions Partners allows you to access 85% of the global routing table.

LINX strongly encourage and promote peering. It's a cost effective solution to reach many networks at once, whilst adding resilience and improved latency to your own network.

LINX are also one of the only IXPs who have an in house Public Affairs advisory team. LINX Public Affairs exists to monitor policy developments that could affect ISPs and other members and to educate and influence policymakers on behalf of the Internet industry.

## LINX: The Facts

- Wavelengths (1/10/40/100G or SDH)
- 673 member ASNs
- Over 650 members
- 65 member countries
- 1547 connected member ports
- 816 member facing 10GigE ports
- 52 member facing 100GigE ports
- Over 3.044Tb/sec of peak traffic
- 13.81 Tb of connected capacity

## Membership Just Got Better!

LINX members are currently benefiting from a 1G port on all available peering LANs totalling a maximum of 6GE, included in their annual membership fee of £1200.

## About IX Reach:

IX Reach is the number one partner to leading Internet Exchange Points and global provider of wholesale connectivity solutions such as direct and remote peering, low latency global high-speed point-to-point and multipoint capacity, Ethernet and DWDM metro in major cities, enterprise business IP, BGP transit, cloud connectivity solutions and colocation.

The IX Reach platform enables carriers, ISPs, content providers and enterprises of all sizes to quickly and easily increase their network footprint without the need to invest heavily in their own infrastructure or increase resources.

### Facts and Figures

- Access to the world's largest IXPs via a single port
- Flexible and scalable CDR speeds from 100Mbps to 10Gbps
- Option to split CDR across multiple locations
- Bundled service for transport
- Delivered over Point-to-Point and Point-to-Multipoint network topology
- Lower operational costs
- Reduction in upstream costs
- Single point of contact for legal, billing and technical
- 24/7 NOC for monitoring and support

IX Reach have built their network on strong foundations and extraordinary expertise. From just a few small seeds in 2007 – with initial PoPs in London, Frankfurt and Amsterdam – they've steadily grown the network to reach new markets and inter-city PoPs, as we make the world even more accessible for their customers.

Through their unrivalled partner network of key Internet Exchanges, data centres and cloud operators, IX Reach offers all the benefits of one simple solution.

### Services

- Wholesale Connectivity
- IX Remote Peering
- BGP Transit
- Colocation
- Cloud Connectivity
- DWDM Connectivity
